

Using Value Based-Arrangements to Improve Partnerships with Post-Acute Providers

Events

09.23.21

Exploring the Possibilities with New Stark Law and Kickback Exceptions. This webinar will explore newly created exceptions to the Stark Law and the Federal Anti-Kickback Statute that permit greater collaboration between hospitals, patients, physicians and post-acute providers. HLB presenters provided practical tips and examples of transactions that can be used to build partnerships between acute and post-acute providers to better serve patient needs and respond to shifting reimbursement methodologies. They also discussed existing value-based and episodic reimbursement models (some now mandatory) used by Medicare and commercial payors.
