HHS Releases Updated Security Risk Assessment Tool v3.6

Digital Health

09.12.25

HHS has launched version 3.6 of its Security Risk Assessment (SRA) Tool, designed to support HIPAA compliance and strengthen data protection. Key updates include a new approval tracking feature, an updated NIST-aligned risk scale, enhanced reporting, refreshed library files, and improved educational content. Join live webinars on September 15 at noon ET or September 16 at 3pm ET to explore the new features and get your questions answered by experts.
