

# CPT 2026: Expanding Code Set in Digital Health

Digital Health

09.12.25

The American Medical Association (AMA) has [unveiled](#) the CPT® 2026 code set, introducing 288 new codes that reflect the latest advancements in medical, surgical, and diagnostic services. Key updates include expanded coding for digital health, remote patient monitoring, and augmented intelligence (AI). Notably, new AI-related codes enhance physician decision-making by analyzing complex data, and remote monitoring codes now cover shorter durations and lower time thresholds.
