

Monica Massaro Joins Alliance for Health Policy Webinar as Speaker

Events

11.24.25

Monica Massaro will present [“The Insider’s Guide to Health Care AI Policy in 2025: Unique Needs, Evolving Approaches,”](#) on December 4, 2025, for the [Alliance for Health Policy](#) webinar.

This event is designed as a “part 2” for learners and leaders interested in a health care AI policy, building on the 2024 Alliance webinar [Demystifying AI Tools in Health Care: An Introduction for Federal Policymakers](#). It will examine how the legislative and regulatory landscape for health care AI has shifted over the past year, and where approaches to federal and state policy are continuing to develop. While AI technologies are advancing at a rapid pace, policymakers face the challenge of designing frameworks that encourage innovation while safeguarding patients and ensuring access to AI-driven improvements across care settings.
