Healthcare organizations with more than 25 physicians must provide formal evidentiary hearings for certain disciplinary actions—a requirement that has become increasingly common since *Economy v. Sutter*. This session, led by a hearing officer, medical staff attorney, and physician attorney, provides a thorough discussion of peer review hearings under California Business & Professions Code §809, covering preparation, procedure, participant roles, and post-hearing processes. Attendees will gain a clear understanding of how to navigate these complex hearings with precision and confidence.
